

**BIG-B TOKEN |  
BEP-20 |**

**VOL. 1**

**WHITEPAPER**

# **INTRODUCTION:**

**BIG-B Token is a hyper deflationary token created and thought by holders, it works as an independent liquidity generation protocol and frictionless autonomous yield farming together with manual burn and buyback features.**

**BIG-B Token Holders benefit through static rewards and also through the Buy-Back/Burn strategy built into the contract. All you need to do is hold BIG-B Token.**

# WHY BIG-B Token?

**BIG-B Token, is a decentralized  
deflationary token**

Our vision is to make the record by growing  
token price from 0.000000001\$ to 0.01\$ in the  
6 month.

# **BUYBACK/BURN PROCESS:**

BIG-B Token buyback/burn function, also known as "The Plutus", is funded by a 2% strategic buyback fee. The Plutus is the Greek god of wealth, and acts as a safety net for all BIG-B Token holders.

The tokens collected from the fees are converted into BNB and securely locked and stored in the BIG-B Token buyback contract. These funds are known as the Plutus's Reserves.

These reserves then become independent of the price of BIG-B Token  
The contract is coded so that the BNB in the Plutus 's Reserves cannot be withdrawn and can only be utilized for the purposes of buying back BIG-B Token tokens from the open market and burning them.

When the buyback function is turned on, the contract automatically buys back and burns tokens after every sell transaction. Once the BIG-B Token tokens are bought back, the new BNB amount is added to the liquidity pool and the BIG-B Token tokens bought are immediately burned.

This creates a true burn and guarantees the price per token will increase every time the buyback is activated.

# TOKENOMICS:

Name: BIG-B Token

Symbol: BIGB

Initial Supply: 100,000,000,000,000

Decimals : 18

Contract: [0x98676ac0b58b745807bebca5cca7dc0151436f64](#)

Blockchain: Binance Smart Chain

# TRANSACTION FEES 10%

4% goes to LP

2% Redistributed to Holders

2% Automatic burn

2% Charity Wallet

# Token Allocation

60% Token Sale Program

15% Team and Founders

5% Marketing and Bounty

7% Reserve Fund

6% Ecosystem Development

3% Board Advisors

4% Airdrop

# ROADMAP:

## Phase 1

- **Concept Generation Team Assemble** ✓
- **Research Proving the concept can work Strategic Plan** ✓
- **Platform design and technical demonstration** ✓
- **Private Sale** ✓
- **Advertising Campaigns** ✓
- **Pre Sale Launch**

A diagram for Phase 2 featuring a vertical grey line on the left with two yellow location pin icons. A horizontal grey line extends from the top pin to a yellow teardrop shape containing a white circle with the text "Phase 2" in red. A vertical grey line extends from the bottom pin to a yellow teardrop shape containing a white circle with the text "Phase 3" in red. The background has a light blue and white geometric pattern.

## Phase 2

- Pancake swap Listing & Liquidity Lock
- Listing on 10 Best Exchange
- Listing on Coingecko
- Listing on CoinMarket Cap

## Phase 3

- Token Manual Burn
- Third Party Audit
- 50,000 holders
- 50M\$ Market cap
- 100000 Community Member

A graphic for 'Phase 4' featuring a yellow location pin icon on the left, connected by a grey line to a large yellow ring containing the text 'Phase 4' in red. The background includes a light blue hexagonal grid and a grey pyramid.

## Phase 4

- 200000 Holders
- Launch Baby Lovely Inu Swap
- Listing on Binance
- 500000 Community Member
- Listing on Coinbase
- Launch Baby Lovely Inu Crypto Exchange
- More to be Announced

# BIG-B Staking

Unlike yield farming and liquidity providing, staking in BIG-B Token is the easiest way to earn free \$BIG-B Token. Staking is important to stabilize the value of \$BIG-B Token. By staking, you are also placing your \$BIG-B Token to secure the network (Proof-of-stake). Staking in BIG-B Swap has no risk and is the easiest method to earn free \$BIG-B Tokens

# BIG-B Swap

The planned BIG-B Token decentralised exchange will allow traders to swap their BEP-20 tokens for another while maintaining full custody of their BEP-20 tokens. Trading BEP-20 tokens privately on.onion sites will be possible thanks to the inclusion of a non-javascript version of the decentralised exchange, which will be accessible only through the Tor Browser and will be devoid of javascript.. This will be an optional feature for individuals who choose to use the Tor browser without any javascript enabled at any tim

# ICO Launchpad

Our ICO Launchpad is a platform for a fundraiser looking to develop their tokens to raise funds for promising projects. This form of initial issuing of tokens (ICO) is called IEO, i.e. Initial Exchange Offering. The platform for selling tokens offered at IEO is precisely what our ICO launchpad is all about
